LETTER OF TRANSMITTAL

Dr. Dallas Herring, Chairman
State Board of Education
Rose Hill, North Carolina

Dear Dr. Herring:

In December, 1966, the State Board of Education made a request of the Community College Advisory Council. The Council was requested to give consideration to involving the staffs of the Department of Community Colleges and the institutions, and others, in the development of standards by which assessment can be made of the quality of the institutions within the Comprehensive Community College System.

The Advisory Council accepted the challenge and developed this document of standards and evaluative criteria. During this standards project, emphasis has been given to obtaining active participation from individuals throughout the System. This involvement of many individuals in cooperative work has been outstandingly successful.

Over one hundred individuals, who are listed in the Appendix, participated in developing the first draft of standards and evaluative criteria. While these individuals actively participated in numerous committee meetings, many other persons have made valuable contributions. The refinement and quality as evidenced in this document are the result of the efforts of many individuals in the Community College System who reviewed the draft and made constructive suggestions.

The project was directed by a Steering Committee of eighteen members, seventeen of whom are also members of the Advisory Council. Dr. Howard Thompson has provided continuous leadership and direction for the Standards Project in serving as Chairman of the Steering Committee and Coordinating Committee. Members of the Steering Committee have given unselfishly of their time in providing leadership to this project. Eight of the members

served as chairmen of subcommittees, five were members of the Standards Coordinating Committee, and others served on one or more of the subcommittees.

The standards and evaluative criteria in this document have been developed within the guidelines unique to the North Carolina Comprehensive Community College System. The use of this document by each institution will insure effective institutional evaluation in a system-wide program of quality education. This program of quality is already underway, because the efforts and learning involved in this experience have made many of us more aware of the need for appropriate qualitative standards.

Steps are now being taken to develop program evaluation standards and criteria. These will be used along with this instrument, which is intended for overall institutional evaluation.

We hope that this document of standards and evaluative criteria fulfills the vision you perceived in requesting the Advisory Council to undertake this project.

Sincerely,

Ben E. Fountain, Jr.

Ben E. Fountain, Jr., Chairman
North Carolina Community
College Advisory Council

APPENDIX INDIVIDUALS WHO PARTICIPATED IN THE STANDARDS PROJECT

INTRODUCTION

EVOLUTION OF THE STANDARDS PROJECT

The first concerted effort towards developing a plan for quality control for the Community College System was begun in 1964. At that time, a proposed plan for institutional improvement was presented and discussed by various groups at a conference for all professional staff personnel within the system.

The plan for institutional improvement consisted of two major parts:

1. An institutional self-study. The institutional self-study is a method by which all members of the institution examine the institution's effectiveness in carrying out its role and includes the development of plans for improvement.
2. Qualitative standards. Qualitative standards are needed in order to assess the quality and performance of an institution. A plan and target dates for the development of a document of standards were proposed at the above mentioned conference. However, the most important action leading to the development of standards and evaluative criteria was initiated in December of 1966 when the State Board of Education adopted a resolution about standards. In this resolution the Community College Advisory Council was requested to give major consideration to involving the staffs of the Department of Community Colleges and the institutions and others in the development of standards by which assessment can be made of the quality of institutions.

This resolution was communicated to the Community College Advisory Council at the December 1966 meeting. A proposal for the development of evaluative criteria and standards was also presented to the Council at that time by the

Department of Community Colleges. The Advisory Council adopted a resolution calling for the appointment of a steering committee to consider the State Board's request and the Department's proposal and if it found the development of standards and criteria to be a worthy idea, to "proceed with the planning of the task."

The Council Chairman appointed an eighteen-man Steering Committee. This committee established organizational structure and procedures for the purpose of developing standards and evaluative criteria at its meeting on November 7, 1967. Plans were made to organize nine subcommittees which are listed in the Appendix.

The first subcommittee was organized in late 1967. However, the bulk of the work of the nine subcommittees was accomplished during the months of April, May, June and July 1968.

In March 1968, a Standards Coordinating Committee, which included five members of the Steering Committee, was organized to expedite and give overall direction to the Standards Project. At its March 1968 meeting, the committee adopted a format and established procedures which were followed by the various subcommittees. The next major function of the Coordinating Committee occurred in August 1968 when all subcommittee reports were edited and organized into a unified standards document.

In September 1968, copies of this document in draft form were sent to all presidents in the Community College System, State staff coordinators, and Steering Committee members. These persons were asked to review the draft for clarity and understanding. Many constructive suggestions were made. These suggestions were utilized by the Coordinating Committee when it edited the final draft in October 1968.

By resolution, the Association of Presidents in the system in October accepted and pledged its support to the document of standards and evaluative criteria. The document was then presented to the Community College Advisory Council for approval, with the State Board of Education scheduled to receive the document in January 1969.

Over one hundred individuals actively participated in the development of standards and evaluative criteria. The subcommittees for the project were composed of presidents, administrators, librarians, counselors, and faculty from institutions within the Community College System, as well as personnel from the Department of Community Colleges and North Carolina colleges and universities.

STANDARDS AND EVALUATIVE CRITERIA AS A MEANS FOR QUALITY CONTROL

Quality control requires yardsticks to assess the quality of institutional performance. It is the intent of the standards and criteria stated in this document to serve as yardsticks for each institution within the Community College System. The standards and criteria reflect the educational role for the system of institutions and the practices that need to be followed by each institution in carrying out its role. Thus, the standards and criteria in this document are a tool to be used in an evaluation process.

Once it is established that an institution's role is properly identified, understood, and accepted, the evaluation process consists of an examination of every facet of the institution's operation to determine the extent to which the purposes are being realized. About everything, whether it is in self-evaluation or in the follow-up committee visit, the fundamental question is this: Does it contribute effectively to the carrying out of the role of the institution?

The standards and evaluative criteria are statements of what ought to be the situation in an institution in order to carry out its role and to have appropriate quality. Proper institutional role performance with appropriate quality are axiomatic. Thus, each institution and agency within the North Carolina Community College System is obliged to use continuously the standards and criteria.

This document of standards and evaluative criteria is designed to assess the quality and performance of the total institution. It is not adequate nor is it designed to evaluate an individual curriculum or course of study. This individual type of evaluation is often needed, and the institution and other appropriate representatives should develop procedures for such evaluations.

It is believed that role performance and quality control can be achieved best by a program of institutional evaluation. A continuous evaluation process should be developed by each institution, and the standards and criteria should be used as a reference and guide. In addition to this, a comprehensive institutional evaluation will be conducted periodically.

The comprehensive evaluation program includes two major procedures:

1. An institutional self-study, conducted by each institution in the system, using as a guide the "Manual for Institutional Self-Study" published by the Department of Community Colleges, and this document.
2. A follow-up evaluation visit of each institution by a committee comprised of knowledgeable persons from other institutions in the system, the State Department of Community Colleges, and other educational institutions in the State.

Suggested Use of the Rating Scale. In the institutional self-evaluation process and evaluation by a visiting committee, a rating of each criterion is suggested using the following scale: (++) Excellent, (+) Good, (0) Average, (-) Fair, (--) Poor, (M) Missing, (NA) Not Applicable. Such ratings should serve as a means to identify the major strengths and weaknesses which should be stated in both the self-study and visitation committee reports.

During the institutional self-study, criteria which are rated "Excellent" should be commented on in the self-study report. Criteria rated as "Poor" or "Missing" should also be noted in the report, along with written plans for correcting limitations. In most cases, the institution will need to comment on a criterion or groups of related criteria rated as "Fair."

In conducting the committee visit, criteria which are rated "Excellent" should be written up in the report as commendations. Criteria which are rated as "Poor" or "Missing" should be listed as limitations and appropriate recommendations should be made. In many cases the committee will need to make recommendations concerning each criterion or groups of related criteria rated "Fair."

Definition of Terms. The following definitions were used by the various subcommittees in selecting areas and in writing standards and evaluative criteria:

1. Selection of Areas for which Standards and Criteria are needed.

Select all and only those areas which have a significant bearing on institutional quality. The significance should be determined on the basis of the philosophy and objectives of the system and sound practices pertinent to the two-year comprehensive institution.

2. Standards. Standards are stated factors or processes considered

essential for an institution to be successful in quality and carrying

out its role. Standards should be stated according to the following principles:

- a. Emphasis should be to state qualitative rather than quantitative standards.
- b. Standards should be stated positively rather than negatively.
- c. Standards should be general statements--the major issues pertinent to quality. Such general statements, then, should serve as the framework for developing more specific statements of evaluative criteria. Thus, the standards should be "principle" oriented with the criteria being statements of practices needed for carrying out the principles.

3. Evaluative Criteria. A series of specific statements used as an indicator or measure of quality--indices of institutional quality. The general stated standards should provide the cue for stating criteria.

The evaluative criteria will be used as a tool for assessing an institution's quality--how well it measures up to the stated standards.

I. PHILOSOPHY AND PURPOSE

INTRODUCTION

The evaluation of an educational institution involves the identification of the purpose of the institution and the appraisal of its effectiveness in carrying out this purpose.

The State of North Carolina, through legislative action and through State Board of Education policy decisions, has assigned to the North Carolina Community College System of institutions, whether named community colleges or technical institutes, a specific role in the accomplishment of certain broad educational objectives found to be necessary for the common welfare of the people of the State. Along with the roles assigned to the public schools and to the four-year colleges and the universities, the realization of the concept of total educational opportunity is thus made possible.

THE SPECIFIC ROLE ASSIGNED TO THE COMMUNITY COLLEGE SYSTEM IS TO ACCOMPLISH THE FOLLOWING PURPOSES:

- . TO PROVIDE EDUCATIONAL OPPORTUNITIES TO THE ADULT POPULATION, EIGHTEEN YEARS OLD AND OLDER, TO THE NUMEROUS INDIVIDUALS WHO ARE EXPERIENCING SOCIAL AND ECONOMIC FAILURE THAT IS DUE TO HANDICAPPING ATTITUDES AND WORK HABITS, TO INADEQUATE BASIC GENERAL EDUCATION, AND TO LACK OF SALABLE SKILLS; AND,
- . TO RAISE THE LEVEL OF PERSONAL FULFILLMENT, OF RESPONSIBLE CITIZENSHIP, AND THE STANDARDS OF LIVING OF THE PEOPLE OF THE AREA THROUGH MORE ADVANCED GENERAL AND OCCUPATIONAL ADULT EDUCATION OPPORTUNITIES; AND,
- . TO MEET FOR INDUSTRY, BUSINESS, GOVERNMENT, AND SERVICE OCCUPATIONS THE PRE-SERVICE AND IN-SERVICE MANPOWER TRAINING NEEDS THAT REQUIRE LESS THAN BACCALAUREATE LEVEL PREPARATION, BUT MORE THAN THE PUBLIC SCHOOLS ARE PROVIDING; AND,

-2-

- . TO PROVIDE, WHERE NEEDED AND IN THOSE INSTITUTIONS NAMED COMMUNITY COLLEGES, THE FIRST TWO YEARS OF ACADEMIC COLLEGE CREDIT STUDIES.

The accomplishment of these purposes requires understanding of and commitment to the role assigned to the system as a whole, including especially the significance of the open door admission policy with selective placement in programs, provisions made for student retention and follow-up, comprehensive and balanced curriculum and extension offerings, and instruction adapted to individual student needs. It also requires that each institution develop fully its understanding of the unique educational needs of its own service area, that it adapt its educational programs accordingly, and that it maintain effective articulation with the public schools, with four-year colleges and universities, and with the manpower training needs of all employers in the area.

Rating Scale for Evaluative Criteria: For each of the criteria, use the symbol that most accurately describes the situation: (++) Excellent, (+) Good, (O) Average, (-) Fair, (--) Poor, (M) Missing, (NA) Not Applicable.

STANDARD: THE INSTITUTION'S STATED PURPOSE SHOULD BE A CLEAR, CONCISE STATEMENT OF ITS ROLE IN PROVIDING ACADEMIC, CULTURAL, AND OCCUPATIONAL EDUCATIONAL OPPORTUNITIES. THE STATED PURPOSE SHOULD BE CONSISTENT WITH THE ROLE ASSIGNED TO THE COMMUNITY COLLEGE SYSTEM, AND SHOULD ALSO IDENTIFY ANY UNIQUE LOCAL NEEDS. THE PURPOSE SHOULD BE UNDERSTOOD AND ACCEPTED BY THE TRUSTEES, THE ADMINISTRATION AND FACULTY, THE STUDENTS, AND THE PUBLIC.

Evaluative CriteriaRating

1. The stated purpose of the institution is the outcome of discussions involving the trustees and the administrative and teaching staff.
2. The stated purpose demonstrates a thorough understanding of and is consistent with the role assigned by State policy to the institution as a part of the State Community College System.
3. The stated purpose demonstrates a thorough understanding of and makes provisions for adaptations required to meet the unique educational needs of the area served.
4. The stated purpose recognizes the importance of and makes provisions for articulation with the roles assigned to the public schools and to four-year colleges and universities.
5. The stated purpose recognizes the importance of and makes provisions for meeting the pre-service and in-service manpower training needs, both present and anticipated, in the area served.
6. The stated purpose recognizes the importance of and makes provisions for policies and programs necessary in the implementation of the stated purpose of the institution.
7. There is sufficient evidence of general consensus acceptance of the stated purpose of the institution by the trustees, the administrative staff, and the teaching faculty, both full-time and part-time.
8. The purpose of the institution is clearly stated in official documents of the institution.
9. Provisions are made fully to inform prospective students about the role the institution is intended to serve.

-4-

10. Provisions are made fully to inform the student body about the role of the institution, and about student responsibility in implementing this role.
11. The public is kept informed about the role of the institution.
12. Provisions are made periodically to review and, if necessary, revise the institution's statement of purpose, with full involvement of the trustees and the staff, and to the extent appropriate the students and representatives of the public served.

II. EDUCATIONAL PROGRAMS

INTRODUCTION

Evaluation of the educational programs offered must be in terms of effectiveness in carrying out the purposes of the institution. It is therefore necessary, in the self-study and in the committee visit, to determine whether the total program offerings and those related factors, such as admission and graduation standards, instructional methods and aids, and curriculum content contribute effectively to the realization of the following:

- . The open door admission policy to the institution, with selective placement in some worthwhile program adapted to the individual's preparation and leading to his educational and occupational objective.
- . After admission, the effective adjustment of program placement and instruction to the end that each individual will have the best possible opportunity to start where he is and progress as far as he can and will go, within the assigned function of the institution.
- . Upon completion of the program, the assurance that the student will have had the quality of instruction and will have completed the curriculum that will make it possible for him to meet successfully the demands of the job for which he has prepared, or to transfer to another institution.
- . The effective meeting, through the educational programs offered, of the comprehensive educational needs of the area served, consistent with the assigned educational role.

A. STANDARDS AND CRITERIA FOR ALL PROGRAMS

Standards and evaluative criteria for assessing the quality of the educational programs of an institution are categorized under the following

-2-

three major program areas: College Transfer and General Education Courses and Programs, Occupational Education Programs, Occupational Extension, and Continuing Education and Community Services Programs. Each of these program areas is subdivided into three parts as follows: admissions, curriculum and instruction. Under these headings, the following standards and evaluative criteria apply to all programs.

Rating Scale for Evaluative Criteria: For each of the criteria, use the symbol that most accurately describes the situation: (++) Excellent, (+) Good, (O) Average, (-) Fair, (--) Poor, (M) Missing, (NA) Not Applicable.

1. ADMISSIONS

STANDARD: WITHIN THE BROAD POLICIES SET FOR THE SYSTEM, THE ADMISSION POLICY OF AN INSTITUTION IS USUALLY AND PROPERLY MADE AND ADMINISTERED AT TWO LEVELS OF AUTHORITY. GENERAL POLICY IS APPLIED BY THE TRUSTEES, NORMALLY ON RECOMMENDATION OF THE ADMINISTRATION. IMPLEMENTATION OF ADMISSION POLICY SHOULD BE THE RESPONSIBILITY OF THE ADMINISTRATION AND THE FACULTY, AND THE AGENCY RESPONSIBLE FOR ADMINISTERING POLICY SHOULD BE IDENTIFIED CLEARLY. IN SOME CASES, THIS AGENCY WILL BE A SINGLE ADMINISTRATIVE OFFICER, OR A COMMITTEE OF THE FACULTY, OR A COMBINED COMMITTEE OF ADMINISTRATIVE OFFICERS AND MEMBERS OF THE FACULTY. IN ANY CASE, THIS AGENCY SHOULD BE IDENTIFIABLE, RECOGNIZED, AND RESPONSIBLE.

IN KEEPING WITH THE ADMISSIONS POLICY, THERE SHOULD BE AN INSTITUTIONAL AGENCY WHICH WILL BE RESPONSIBLE FOR ESTABLISHING AND MAINTAINING THE CRITERIA FOR ADMISSION TO EACH OF THE VARIOUS PROGRAMS.

THE ADMISSION POLICIES OF AN INSTITUTION SHOULD BE CLEARLY EXPRESSED AND OPENLY PUBLISHED AND SHOULD EXPLAIN BOTH GENERAL AND

-3-

SPECIFIC REQUIREMENTS AND PATTERNS OF SECONDARY SCHOOL COURSES, WHERE REQUIRED.

THE PROCEDURES WITH REGARD TO ACCEPTING TRANSFER CREDIT SHOULD BE DEFINED CLEARLY. THE QUALITY OF WORK FOR TRANSFERRED CREDITS SHOULD BE IN KEEPING WITH THE QUALITY REQUIRED OF ALL STUDENTS OF THE INSTITUTION. THE STUDENT TRANSFERRING SHOULD BE OFFICIALLY INFORMED AT THE TIME OF HIS ADMISSION EXACTLY AS TO THE STATUS OF HIS ADVANCED STANDING.

THE INSTITUTION IS ENCOURAGED TO DEVELOP EXPERIMENTAL PROGRAMS THAT ARE RELEVANT TO THE EDUCATIONAL NEEDS OF DISADVANTAGED, ADVANCED, AND TALENTED STUDENTS.

THERE SHOULD BE A DEFINITE AND CLEARLY DEFINED PROCEDURE REGARDING TRANSFER AMONG PROGRAMS. EFFORTS SHOULD BE MADE TO AVOID WITHDRAWAL FROM THE INSTITUTION BECAUSE OF ACADEMIC FAILURE.

THERE MUST BE A DEFINITE PROCEDURE IN THE ADMINISTRATION OF ADMISSION POLICY WHICH SHALL BE FOLLOWED IN THE ADMISSION OF ALL STUDENTS. ALL PERTINENT DOCUMENTS SHOULD BE ON FILE AND EXAMINED BY THE ADMISSIONS PERSONNEL FOR EVIDENCE OF HIS ABILITY TO MAKE SATISFACTORY PROGRESS BEFORE A STUDENT IS REGISTERED IN A PARTICULAR PROGRAM.

IT IS THE RESPONSIBILITY OF THE INSTITUTION TO ASSURE THAT ITS RECRUITING ACTIVITIES AND MATERIALS PORTRAY THE INSTITUTION ACCURATELY AND HONESTLY.

Evaluative Criteria

Rating

1. The Trustees have approved admission policies to the institution and to each separate program, consistent with the above standards and with State Board of Education policies.

-4-

2. The full- and part-time staff of the institution is fully informed about and supports the admission policies to the institution and to each separate program.
3. Prospective students are fully informed about the admission policies to the institution and to each separate program.
4. The public in general is given full information about the admission requirements to the institution and to each separate program.
5. Admission requirements and procedures are published in appropriate documents, including the catalogue of the institution.
6. The administration of admission policies is delegated clearly to staff committees and individuals in accordance with the above stated standards.
7. The staff assigned responsibilities for admissions has the competence required to accomplish the task assigned.
8. This staff is large enough to make possible the individual student attention required in an open door institution.
9. Through transfer from program to program, full provision for opportunity for remedial instruction, and in every other way possible students are encouraged to find their places rather than to leave the institution without accomplishing reasonable educational objectives.
10. Appropriate attention is given to the needs of disadvantaged, advanced, and talented students.
11. Provisions are made for transfer credits and advanced standing where appropriate for each entering student.
12. The institution is portrayed accurately and honestly in recruitment contacts.
13. Provisions are made for faculty advisement of students in subject areas.

2. CURRICULUM

STANDARD: THERE SHOULD BE A CLEARLY DEFINED PROCESS BY WHICH THE CURRICULUM IS ESTABLISHED AND CONTROLLED. THIS PROCESS SHOULD RECOGNIZE THE VARIOUS ROLES OF THE STATE BOARD OF EDUCATION, THE TRUSTEES, THE ADMINISTRATION, AND THE FACULTY.

THE DETERMINATION OF GENERAL POLICY IS THE RESPONSIBILITY OF THE STATE BOARD OF EDUCATION AND THE TRUSTEES. SUCH MATTERS AS THE NUMBER AND TYPES OF PROGRAMS OFFERED ARE AREAS OVER WHICH THE STATE BOARD OF EDUCATION AND THE TRUSTEES HAVE JURISDICTION. THE IMPLEMENTATION OF THE GENERAL POLICY AND THE DETERMINATION OF SPECIFIC ACADEMIC DETAILS ARE THE RESPONSIBILITY OF THE ADMINISTRATION AND THE FACULTY.

RESPONSIBILITY FOR CURRICULUM CONTROL AND ADMINISTRATION SHOULD BE DEFINED, WITH THE CHANNELS OF COMMUNICATION AND CONTROL CLEARLY ESTABLISHED.

THE SCOPE AND NATURE OF THE CURRICULUM SHOULD BE RELATED TO THE STATED PURPOSES OF THE INSTITUTION AND IN KEEPING WITH THE AVAILABLE RESOURCES, BOTH FINANCIAL AND ACADEMIC.

THERE SHOULD BE AN ORDERLY SEQUENCE OF COURSES WITH AN ADEQUATE NUMBER OF HOURS REQUIRED IN COURSES WITH AN APPROPRIATE SYSTEM OF PRE-REQUISITES AND ELECTIVES.

THE CATALOGUE AND OTHER PUBLISHED MATERIALS CONCERNING INSTITUTIONAL OFFERINGS SHOULD ACCURATELY AND HONESTLY REFLECT THE ACADEMIC RESOURCES OF THE INSTITUTION.

Evaluative Criteria

Rating

1. Curricula are approved by the Trustees and the State Board of Education in accordance with established procedures.

-6-

2. The curricula offered are consistent with the role of the institution as a part of a state-wide system and as a community institution.
3. The curricula offered are in keeping with the available resources; financial, faculty, equipment, etc.
4. Each curriculum is kept up-to-date by constant review.
5. Where appropriate, advisory committees are used in the initiation and development of new curricula.
6. For each curriculum there is an orderly sequence of courses, with appropriate hours, prerequisites, and electives.
7. The catalogue shows clearly and honestly the full scope of curriculum offerings.

3. INSTRUCTION

STANDARD: EFFECTIVE INSTRUCTION DEPENDS LARGELY UPON THE GENERAL ENVIRONMENT IN THE INSTITUTION. THIS ENVIRONMENT SHOULD BE CONDUCIVE TO TEACHING AND LEARNING. THE INSTITUTION SHOULD ENDEAVOR TO CREATE A CLIMATE OF INTELLECTUAL CURIOSITY AND ACHIEVEMENT AMONG ITS STUDENTS. THE FACULTY AND ADMINISTRATION SHOULD BE ABLE TO PROVIDE EVIDENCE OF CONCERN FOR THE GENERAL SETTING IN WHICH LEARNING IS EXPECTED TO TAKE PLACE. SUCH EVIDENCE SHOULD INCLUDE EFFORTS TO PROVIDE FOR THE PROFESSIONAL GROWTH OF THE FACULTY, PROVISION FOR EXTRACURRICULA SEMINARS AND LECTURES, AND OTHER MEANS OF CREATING A STIMULATING ENVIRONMENT.

PROGRAMS AND COURSES SHOULD BE SUPPORTED BY ADEQUATE LIBRARY HOLDINGS, INSTRUCTIONAL MATERIALS, AND PHYSICAL FACILITIES. EFFICIENT USE OF SUCH RESOURCES IS AN INDICATION OF CONCERN FOR EFFECTIVE INSTRUCTION. IT SHOULD ALSO BE POSSIBLE TO DEMONSTRATE THAT THEY ARE USED EFFECTIVELY IN THE INSTRUCTIONAL PROCESS.

-7-

INSTRUCTION SHOULD BE RELATED TO THE OBJECTIVES OF EACH COURSE, THE CAPABILITIES OF THE STUDENTS, AND THE GENERAL INSTITUTIONAL STANDARDS OF QUALITY. THE PROCESS OF INSTRUCTION SHOULD BE ORGANIZED SO THAT STUDENTS HAVE A CLEAR IDEA OF THE AIMS AND THE REQUIREMENTS OF EACH COURSE, AND THE METHODS OF EVALUATION EMPLOYED. EXPERIMENTATION WITH DEVICES AND TECHNIQUES IN THE IMPROVEMENT OF INSTRUCTION SHOULD BE ENCOURAGED, BUT SHOULD BE SUBJECT TO CRITICAL ANALYSIS.

EVALUATION OF INSTRUCTION SHOULD BE RELATED TO THE EFFECTIVENESS OF THE TEACHING-LEARNING PROCESS, SUBJECT MATTER, COURSE OBJECTIVES, AND THE PROGRAM OF STUDIES. THE EFFECTIVENESS OF INSTRUCTION SHOULD BE UNDER CONTINUOUS STUDY. ATTEMPTS SHOULD BE MADE TO EVALUATE THE LONGER AND MORE GENERAL EFFECTS OF INSTRUCTION BY SUCH DEVICES AS COMPREHENSIVE EXAMINATIONS, THE FOLLOWING UP OF GRADUATES, AND THE SAMPLING OF THE OPINIONS OF FORMER STUDENTS.

EFFECTIVE INSTRUCTION IS RELATED TO CLASS SIZE, THE INSTRUCTIONAL LOADS AND THE NATURE OF THE COURSE. THE SIZE OF CLASSES SHOULD BE GOVERNED BY THE NATURE AND PURPOSE OF THE COURSE, THE ADEQUACY OF TEACHING FACILITIES, THE COMPETENCIES OF THE TEACHING STAFF, AND THE CHARACTERISTICS OF THE STUDENTS INVOLVED. IN LARGE CLASSES, APPROPRIATE PROVISION SHOULD BE MADE FOR INSTRUCTIONAL ASSISTANCE, THE DIVISION OF CLASSES INTO SMALL SECTIONS MEETING AT DIFFERENT TIMES, INDIVIDUAL CONFERENCES, OR OTHER DEVICES.

Evaluative Criteria

Rating

1. The general environment of the institution is conducive to effective teaching and learning.
2. Students give evidence of being motivated to do their best.

-8-

3. The faculty does its best to take students where they are and carry them as far as they can and will go in the learning process.
4. The faculty participates appropriately in the selection of textbooks, library materials, teaching aids, and equipment.
5. Assistance is given the faculty in providing an optimum classroom learning climate by being furnished the necessary instructional tools.
6. Clerical and, where necessary, assistant help is provided the faculty.
7. The teaching load is conducive to good teaching.
8. The library, laboratories, shops, etc., are adequate and are actually used effectively by students.
9. Instruction is related to course objectives, which are understood by students.
10. Requirements for satisfactory course completion are related to the requirements the students will have to meet in their "next step."
11. Measurement of student achievement is a carefully designed and applied process.
12. Evaluation of instruction is a continuous process, with faculty, students, former students, and the receivers of the output of the institution involved.
13. Within the staff, there is clear and accepted differentiation between individual faculty freedom to teach and the leadership responsibilities of department heads, directors, deans, and others.

B. STANDARDS AND CRITERIA FOR COLLEGE TRANSFER AND GENERAL EDUCATION COURSES AND PROGRAMS

The goal of liberal arts and pre-professional college transfer programs is to provide quality programs designed for transfer to senior institutions. The goal of the general education program is to provide for intellectual, cultural and social development of the individual student who wants and needs general education courses or a two-year program of general education beyond the high school but does not plan to transfer and work toward a baccalaureate degree.

The requirements of the "next step," and the needs, interest, and abilities of the students should be guiding principles in the determination of admission policies, course objectives and content, teaching techniques, instructional materials, and evaluation standards.

Rating Scale for Evaluative Criteria: For each of the criteria, use the symbol that most accurately describes the situation: (++) Excellent, (+) Good, (O) Average, (-) Fair, (--) Poor, (M) Missing, (NA) Not Applicable.

1. ADMISSIONS

STANDARD: STUDENTS ADMITTED TO THE COLLEGE TRANSFER AND GENERAL EDUCATION ASSOCIATE DEGREE COURSES AND PROGRAMS SHOULD HAVE COMPLETED A SECONDARY SCHOOL PROGRAM OR THE EQUIVALENT WHICH PROVIDES ALONG WITH OTHER EVIDENCE, A REASONABLE PROSPECT FOR SUCCESS IN THE PROGRAM TO WHICH ADMITTED. APPLICANTS WHO CANNOT MEET THIS STANDARD SHOULD BE GUIDED INTO COURSES WHERE DEFICIENCIES CAN BE REMEDIED OR INTO ANOTHER PROGRAM APPROPRIATE TO THE INDIVIDUAL'S PREPARATION AND OBJECTIVES.

Evaluative Criteria

Rating

1. The program employs appropriate policies and practices relating to admission.

-10-

2. Admission practices conform to the philosophy of the institution.
3. The admission policy is clearly stated in published materials.

2. CURRICULUM

STANDARD: CURRICULA OFFERINGS IN THE COLLEGE TRANSFER PROGRAM SHOULD INCLUDE THOSE COURSES WHICH ARE USUALLY OFFERED THE FIRST TWO YEARS OF A FOUR-YEAR PROGRAM IN THE PROFESSIONS OR LIBERAL ARTS. IN THESE COURSES THERE SHOULD BE ADHERENCE TO QUALITATIVE STANDARDS SO THAT THE SCHOLASTIC STANDING OF THE STUDENT WILL CONTINUE ON A SATISFACTORY LEVEL. CLOSE ARTICULATION SHOULD BE MAINTAINED WITH THOSE SENIOR INSTITUTIONS TO WHICH MOST OF THE INSTITUTION'S GRADUATES WILL TRANSFER. STANDARDS FOR TWO-YEAR INSTITUTIONS AS ESTABLISHED BY THE REGIONAL ACCREDITING ASSOCIATION SHOULD BE OBSERVED AS GUIDELINES FOR THE COLLEGE TRANSFER PROGRAM, BOTH QUANTITATIVELY AND QUALITATIVELY.

THE TERMINAL ASSOCIATE DEGREE PROGRAM IN GENERAL EDUCATION SHOULD PROVIDE A CORE OF APPROPRIATE INSTRUCTION IN ENGLISH, MATHEMATICS, THE HUMANITIES, THE SOCIAL SCIENCES, THE NATURAL SCIENCES, AND ELECTIVES, AS REQUIRED TO ROUND OUT THE INDIVIDUAL'S EDUCATION AT THIS LEVEL.

Evaluative Criteria

Rating

1. The program has a statement of purpose which is in accord with the philosophy of the institution.
2. The college transfer program employs graduation requirements which are sufficiently rigorous to provide reasonable assurance for success for the graduate in a senior institution, sufficiently clarified and quantified to be clearly understood and interpreted by the receiving institution.

-11-

3. The general education program provides educational offerings for those students whose goals are not to transfer to a senior institution.
4. The program provides for a follow-up of students.
5. The program involves optimal participation of staff members, department heads and community resource people.
6. Liaison is maintained with appropriate officials of senior institutions.
7. The program supports its credit-course offerings with a sound base of refresher or guided studies in those skill areas which undergird the liberal arts.
8. Course prerequisites are carefully evaluated in terms of their applicability to sequential learning experiences.
9. The catalogue contains all curricula courses offered with a clear, concise, and accurate description of each course.
10. The grading system is understood by staff, faculty, and students.
11. The program reflects a justifiable balance between required and elective courses.
12. The staff and faculty use as a reference for the transfer program the "Articulation Guidelines" developed by the Joint Committee on College Transfer Students.*

3. INSTRUCTION

STANDARD: INSTRUCTION SHOULD BE AT A LEVEL TO ASSURE THE ACHIEVEMENT OF THE OBJECTIVES OF THE PROGRAMS OFFERED. EMPHASIS SHOULD BE GIVEN TO EFFECTIVE TEACHING AND LEARNING THROUGH THE USE OF APPROPRIATE METHODS AND MATERIALS.

*Copies are available through the College Transfer Division of the Department of Community Colleges.

Evaluative CriteriaRating

1. The instructional program is adequately staffed, both in terms of quantitative and qualitative factors.
2. The institution has sufficient equipment, supplies, audiovisual aids, and facilities to accomplish the purposes of the institution.
3. The instructional methods are in accord with the institution's stated philosophy and purposes.
4. Staff members participate in professional activities.
5. The program uses the "continuous self-study" concept to provide on-going self-improvement. This process places emphasis upon institutional and individual innovation and creativity, in an effort to attain fresh approaches to teaching and learning.
6. Up-to-date syllabi of courses offered and containing statements of objectives are available in a central location for all courses taught.

C. STANDARDS AND CRITERIA FOR OCCUPATIONAL EDUCATION PROGRAMS

The primary objective of occupational curricula is to prepare people for employment in the occupations for which the curricula are established. D. STANDARDS AND CRITERIA FOR OCCUPATIONAL EXTENSION, CONTINUING EDUCATION AND COMMUNITY SERVICES

Today, as never before, it is apparent that tomorrow belongs to the "learning" and not to the "knowing." This is a result of the social, economic, and technological changes in society. These changes have placed certain demands on people to continue their education, regardless of the level of their prior education and have dictated that people seek activities that will help them to acquire new knowledge and understanding, and to develop new attitudes, values and skills needed to cope with changing society.

The Community College System is charged with the responsibility of occupational extension, continuing education and community services. Institutions have the responsibility to provide programs designed to meet the educational needs of all citizens, and to help the individuals to be more productive and responsible citizens. Programs should also be provided to prepare individuals for employment, to upgrade the skills of the employed, and to retrain others for new employment. The guiding principle in developing programs is to provide individuals opportunities to develop their abilities and interests. The programs are limited only by imagination.
